Thos J Casey Chief Eng
My Dear Sir

I submit below prices for Private line and instruments, also for Exchange connections. These rates are very much below the regular rates and think will prove satisfactory to you and the Committee. I think all things considered the Exchange connection would be very much more satisfactory to you with no greater expense.

I will build the Private line for for all your Stations for \$200, and send you instruments (Complete sets Telephones Transmitters Bells Backboards Batteries^{rs}) and keep the same in order for \$25. each set. regular price \$40. Or I will connect all of these stations with the Exchange for \$36. for per. regular

price \$52.

With the Private line all stations would be on one line and the resistance of 10 May Bells would be so great that I am afraid you would not be satisfied, but if connected with the Exchange these stations would be on three separate wires and I think would give you satisfaction.

Very Resp

Geo E Hanson
