Cambridge City Council

RECEIVED  
JUN - 9 1989

Dear Council Members:

Ans'd.....

As parents of children in childcare, we write to request reconsideration of a policy which is destructive of affordable quality programs in Cambridge. At present the budget of the Childcare Division of Cambridge Human Services includes salaries for administrators only. Childcare teachers' salaries are covered by parents' fees. These salaries are so low that childcare teachers cannot stay in their profession. The resulting staff turnover year after year has denied children the consistent experienced teachers they need. Each fall programs have to start from scratch while staff members learn on the job. As parents we want there to be incentive for qualified teachers to remain and build stronger programs.

Parent fees increase annually, but staff salaries remain at the poverty level. The solution must come by sharing the cost of fair compensation for teachers between parents and the city.

Cambridge should be proud of its commitment to children and childcare. That pride ought to extend to proper treatment for those responsible for its childcare programs.

Respectfully Yours,

*Janet Hilsowitz*

*King After School parent*

Ans'd.....

Dear Council Members:

We, the Childcare teachers of the Cambridge Department of Human Services, are writing to express our concern over the existing situation in the Department's Preschool and Afterschool programs. It is a situation which prevents children and parents from receiving the quality childcare they deserve.

There is an extremely high staff turnover due largely to the low teacher salaries and lack of adequate benefits. Unlike other Cambridge city employees, Childcare teachers have no pension, no maternity leave, and no option for family health coverage. The current low level of teachers' salaries makes it impossible for them to remain with their programs on a long-term basis, thus disrupting the continuity the children need. The city currently pays the salaries of Department administrators, while parents of children enrolled in the programs are responsible for paying teachers' salaries. We feel this puts an unfair burden on parents and we urge the City to respond with compassion to their situation.

We feel that another way to increase the quality and stability of the programs is by providing adequate tuition reimbursement for staff enrolled in job-related courses. This would serve as added incentive for teachers to further their education and to bring their knowledge and experience to their jobs.

We believe that our goal is an important one: to provide affordable quality childcare to the parents and children of Cambridge. It is a goal that cannot be achieved without additional support.

Respectfully Yours,

*Deane Zylitz*

Dear Council Members:

As parents of children in childcare we write to request reconsideration of a policy which is destructive of affordable quality programs in Cambridge. At present the budget of the Childcare Division of Cambridge Human Services includes salaries for administrators only. Childcare teachers' salaries are covered by parents' fees. These salaries are so low that childcare teachers cannot stay in their profession. The resulting staff turnover year after year has denied children the consistent experienced teachers they need. Each fall programs have to start from scratch while staff members learn on the job. As parents we want there to be incentive for qualified teachers to remain and build stronger programs.

Parent fees increase annually, but staff salaries remain at the poverty level. The solution must come by sharing the cost of fair compensation for teachers between parents and the city.

Cambridge should be proud of its commitment to children and childcare. That pride ought to extend to proper treatment for those responsible for its childcare programs.

Respectfully Yours,

Ans'd.....

Dear Council Members:

As parents of children in childcare we write to request reconsideration of a policy which is destructive of affordable quality programs in Cambridge. At present the budget of the Childcare Division of Cambridge Human Services includes salaries for administrators only. Childcare teachers' salaries are covered by parents' fees. These salaries are so low that childcare teachers cannot stay in their profession. The resulting staff turnover year after year has denied children the consistent experienced teachers they need. Each fall programs have to start from scratch while staff members learn on the job. As parents we want there to be incentive for qualified teachers to remain and build stronger programs.

Parent fees increase annually, but staff salaries remain at the poverty level. The solution must come by sharing the cost of fair compensation for teachers between parents and the city.

Cambridge should be proud of its commitment to children and childcare. That pride ought to extend to proper treatment for those responsible for its childcare programs.

Respectfully Yours,

*Marie Buisson*  
Parent
