

Communications 1/1/98

Regarding placing an art piece in the Fresh Pond Meadows area.

Cities should have Nature areas that are as natural as possible'

Cities tend to induce humanity's ego aspect to become inflated. When this occurs we lose touch with the Divine Creations of GOD. GOD'S ART keeps us healthy. Instructs us in wisdom and patience. Makes us good stewards of the Earth. Keeps us humble.

There should be no art in the fresh pond area. It should remain as much as possible purely GOD'S ART.

Art belongs in the city where it serves to remind people of beautiful ways of living. Art in the city counteracts the ego's tendency of self centeredness. Cities need things in them to influence people to be cooperative.

Art in Nature should only occur sparsely where there is so much Nature that it presents a delightful sense of playfulness.

Nature right next to a city serves the very special purpose mentioned. It should be cherished and let be.
