CAMBRIDGE, MASS.

Public Works Department

Everett R. Kennedy
Acting Commissioner

August 22, 1983

Secretary
Executive Office of Environmental Affairs
20th Floor
100 Cambridge Street
Boston, MA 02202

Dear Sir:

In reference to the Alewife/Blackstone 115 KV cable and substation proposed by Commonwealth Electric, the administration of the City of Cambridge is unable to consider the project as described in the ENF.

The City needs the cooperation of all utilities to disclose their long range objectives so that it can coordinate utility improvements with its own requirements and try to minimize the adverse effects of future utility construction.

To this end the Public Works Department of Cambridge wishes to call a meeting as soon as possible with all parties concerned.

The City will forward its comments concerning ENF file #4844 after the meeting.

Very truly yours,

Everett R. Kennedy
Acting Commissioner
