Re: City Council Order to revise rubbish collection routes

The City Council recently directed the Public Works Department to revise the collection routes in order that the Tuesday and Friday schedules be reversed.

I request that this order not be implemented at this time, it would create more problems than we could solve. Some of the problems are as follows:

1. The Friday collection area is extremely small compared to the other areas. This is because if we have any major breakdowns on the other days we can usually catch up and have all the rubbish collected by Friday P.M. To change the areas would require major shiftings to insure that a small area would be on Friday's route.
2. The Public Works Department presently has six new trucks on order. When these trucks are received, some revisions to the collection schedule may be needed. It would confuse the people to revise them now, and again later.
3. The present energy crisis creates many uncertainties at this time and we may be forced to make additional changes.

In summary the present collection schedule provides the best use of equipment and man power for the entire city. Except for the one week of October 21, 1973, all collections in this area have been made on schedule. I therefore request that this order be delayed and that I will try to continue to provide the best rubbish collection pick-up schedule that can be maintained with the least inconveniences to the citizens.

Very truly yours,

Conrad C. Fagone
Public Works
