To The Honorable, The City Council:

In response to Awaiting Report Item No. 33, regarding the condition of the utility cover at Huron Avenue and Standish Street, please be advised of the following:

The Cambridge Water Department has informed this office that the matter of gushing water at this location is caused by ground water, which occurs when water tables raise due to heavy rains and other various reason. As the water builds up in the utility hole, it fills up and pours out through the cover.

The utility cover is owned by the M.B.T.A. After informing them of the problem they have reported that they will raise the casting on the cover which should prevent the water from gushing into the street. The work should be completed within a week's time.

Very truly yours,

A handwritten signature in dark ink, appearing to read "Robert W. Healy", is written over a horizontal line.
