Condition Report

Subject

Transmitted herewith is a report outlining the results of survey of the sidewalk & street conditions recently completed by the Department of Public Works. The results tabulated are approximate and do not entirely represent the status of streets in the City. They do however reflect the general conditions in the City.

The results tabulated are as follows:

|       |                            |      |              |
|-------|----------------------------|------|--------------|
|       | Streets Surveyed           | 524  |              |
|       | 211 Good streets or        | ---- | 40.2%        |
|       | 180 Fair streets or        | ---- | 34.3%        |
|       | <u>133</u> Poor streets or | ---- | <u>25.4%</u> |
| Total | <u>1524</u>                |      | <u>99.9</u>  |

|       |                              |      |              |
|-------|------------------------------|------|--------------|
|       | Sidewalks Surveyed           | 1044 |              |
|       | 122 Good sidewalks           | ---- | 11.6%        |
|       | 212 Fair sidewalks or        | ---- | 34.3%        |
|       | <u>710</u> Poor sidewalks or | ---- | <u>68.1%</u> |
| Total | <u>1044</u>                  |      | <u>99.9</u>  |

As one can see from this survey, much work remains to be done on street and sidewalk construction in the City. Effective immediately, the City will no longer install any Bituminous concrete sidewalks. Sidewalks will be constructed of brick or concrete. Concrete will be used in main streets and heavily travelled areas. Property owners will not determine what will be used for construction; This decision will be based on what the majority of the materials used on the particular street.
