**Real Traffic Calming for Holworthy Street**

Dear Mr. Healey:

We the undersigned residents of Holworthy Street urge you to include the installation of "speed humps" (not bumps that are found in some parking lots) in two locations on Holworthy Street during the forthcoming project to resurface it. Inclusion of these traffic calming devices will persuade motorists to drive at speeds which are safe in a dense residential neighborhood, where children may be found playing in the street.

Currently, the street is very wide: overall width is between 33 and 34 feet. With unmarked 8 foot parking lanes on each side, the width is reduced to 17 feet. With a 5 foot bike lane included in the proposed resurfacing, the motor vehicle travel lane is reduced to 12 feet, standard for high-speed highways. Speed humps are designed to ensure that cars travel at speeds between 15 and 20 mph. For safety's sake they must be included in the street resurfacing project.
