To the Honorable, the City Council:

In response to Awaiting Report #26 regarding the repaving of Western Avenue, please be advised of the following:

A further review of this order and the Engineering Department's shooting of grades along the gutter line indicates that the road problem is not caused by the paving work; the problem exists because the catch basin in this area is not adequate. The Department of Public Works (DPW) has determined that the paving work is acceptable, and the solution to the problem is in the installation of a new catch basin. This will be done by the DPW this Spring.

Very truly yours,

Robert W. Healy
City Manager
