Dear City Council Members:

As a small landlord, I would like to express to you my frustration dealing with the current Rent Control System. It takes a horrendous amount of time, paper work and patience to get any rent increases processed. I can see why many small landlords with rent control units just let their properties go to pot.

I have enclosed a copy of a letter I sent to Margaret Drewrey which outlines a typical situation I confront in trying to get anything accomplished. I think this situation is outrageous and can't believe the City Council continues to let it exist. The needy and poor that Rent Control is intended to help are few and far between. I implore you to do away with this system which no longer fulfills any useful purpose but leads to the deterioration of property and neighborhoods.

Sincerely,

A handwritten signature in cursive script that reads "Michael L. Dull".

Subject: Removal Permit for 303 Pearl Street, No. 3

Dear Margaret:

On January 12 I applied for a removal permit for this vacant apartment. The former tenant, Martha Schaeffer, left without notice some time around the first part of December. The apartment is in very poor condition and has no bathroom with it. I propose to finish off the attic space of the building and thereby add two bedrooms and a bath and to remodel the existing unit.

It is now March 17, and the hearing examiner, Paula Johnson, has not finished her report, nor can she tell me when the report will be finished. She did say I may look towards the later part of April or the first part of May for the hearing to come before the board. At the hearing and several times thereafter, I asked her to complete the report as soon as possible because the apartment had been vacant since December and I am not collecting any rent in the meantime, which makes it difficult to support the mortgage and other expenses on this five-unit building.

I think it is outrageous that such a small matter should take so much time. I also find it ironic that the removal permit system which in part is intended to keep units from being removed from the market is now responsible for removing my unit from the market for an additional four to six months. This also puts an unreasonable financial strain on a small landlord. My last request for a rent increase based on roof expenses, which had been improperly denied as a duplicate expense and the board asked for further information which I provided within five days, took over one year to get completed. It seems that the Rent Control office is very quick to act upon tenant complaints or demands, but very slow when it comes to landlord requests.

I ask that you please expedite my removal permit application now.
