To The Honorable, the City Council:

I am concerned that the designation of the Engine Seven Fire Station in Kendall Square as a historical site will have a negative impact on the proposed Frisoli Youth Center.

It is my understanding that the amount of revenue the city can expect to receive for the station would be significantly reduced once constraints are attached to its use. Since the city was planning to earmark those funds for the building of the new youth center in East Cambridge it is possible that the project is in jeopardy.

The needs of the many young people of East Cambridge must take priority over the needs to save one building.

Sincerely yours,
