

City of Cambridge

15.

IN CITY COUNCIL

October 24, 1983

MAYOR VELLUCCI
COUNCILLOR DANEHY

- WHEREAS: Many difficult local, national and global problems directly affect the citizens of Cambridge; and
- WHEREAS: A better understanding of these problems is a necessary first step to their solution; and
- WHEREAS: These problems are often further complicated by a failure of various levels of government to recognize, analyze and act to solve them; and
- WHEREAS: There are more schools, colleges, universities and institutions of higher learning in and around Cambridge than any other spot on the globe; and
- WHEREAS: The City of Cambridge is therefore in a unique position to take advantage of the expertise of its citizens; and
- WHEREAS: The Cambridge City Council has at times in the past recognized its unique position by confronting some of the most difficult questions concerning the effects of science and technology on society; and
- WHEREAS: Cambridge in some of these areas, such as recombinant DNA research, and the nuclear weapons problem, has indeed made major contributions to the understanding and civic health of the entire nation and even the world; and
- WHEREAS: We have often seen discussion of complex problems move from the Cambridge City Council directly into the national media and the Congress; and
- WHEREAS: It is clear from this pattern that the Cambridge City Council is fulfilling a real local, national and global need when it performs this function; now therefore be it
- RESOLVED: That the Cambridge City Council should establish and appoint a Citizen's Scientific Advisory Board to inform the City Council and the Mayor on questions of public policy.

In City Council October 24, 1983.
Adopted by the affirmative vote of 9 members.
Attest:- Paul E. Healy, City Clerk.
