

Communications 3/23/2000 Preparatory information regarding major geological planetary events/ National Officer In Charge Peter Valentine 37 Brookline St.

There is a major astrological configuration about to solidify in May.

Taurus represents the Bull, Solidness, Stability, the Foundation. It's the 2nd house, the house of money, land, morality, These are foundations upon which life exists. Even the mighty waters rest upon the Foundation of the Earth.

The major planets gathering together there represent an intense concentration of imbalanced energy. This energy will seek balance. Taurus is located in the fifth and especially sixth house, the house of Virgo. The sixth house is the house of physical cleansing. Of physical purification.

It is vitally noteworthy to consider that in IndoAsia the configuration is not in Taurus but in Aries. The sign which covers war.

In that area Pakistan and India are at war over Kashmir, but next to them is China which considers that it owns part of Kashmir.

Thus forces in that area will be very inclined toward an explosion of war. If fighting spreads between Pakistan and India, China might invade Kashmir and use nuclear weapons. It may fear that if Pakistan and India use nuclear weapons the radiation could spread to China. For this reason China might want to dominate the situation with fear of it and thus prevent India and Pakistan from going to all out war, which China, whose leadership is in a war frenzy mood over Taiwan, might fear could lead to nuclear weapons. China has massive supplies of nuclear weapons as well as other armaments. However if either Pakistan or India use nuclear weapons against China then China will retaliate in the extreme because there is no concept as to how far an enemy would go in using nuclear weapons. For the use of nuclear weapons in the extreme could mean quick defeat or annihilation. Once China began retaliating with nuclear weapons the situation would explode into all out war in the entire region.

This would be the fulfilling of the massive eclipse of the moon over the entire EuroIndoAsia continent which recently went from ("Land's End" point in England to the Indian Ocean). Get the message ? Wherever the eclipse touched ground there the land would end. Such eclipses historically have always been the precedent for millions of people dying and great destruction.

To look at it from the largest picture possible I would say, what is really happening is that the Earth is about to clean house. It is the moment of payback time against all the entities who have defiled the Earth. There would be many forces involved in the direction of events, of other worldly origin since the history of the Earth, its resources and galactic location give it strategic importance for the concerns of other galactic nations in this area both friendly and hostile. Equipped with multidimensional knowledge we are now engaging in the entire situation.

Signs of the comings of great disturbance could start in late April and erupt on May 3rd. The effects of this cleansing will reverberate throughout the planet. All those in harmony with the Earth will survive all those who have defiled it will be removed. It is for those who love the work of The Creator a time of Great and Terrifying Liberation. In any case, we shall see shortly.

For me the possibility is real enough to take this chance in order to be ready.
