April 23, 1952

Mr. Frederick Burke
City Hall
Cambridge Mass

Dear Mr. Burke

Since January of this year I have been taking the Belmont bus out of Harvard Square each morning and would like to know if it is possible to have a bus stop in Brattle Square as I live on Mt. Auburn Street.

During the last months this winter I found it difficult and in many cases had to take a car outside my door which of course cost me fifteen cents.

It is a loss of time to walk over to Stevens Square and then ride right back to where I started from. In any morning it passes me as I am walking up Bratle street but there is nothing to do but go over to Stevens Square and wait for the car in. I hope you will be able to do something about it.

Very truly

(Miss) Elsie M. Nielsen

115 Zeb. Auburn Ave

South Bend

Cambridge,.....19

To the Honorable, the City Council of the
City of Cambridge:

The undersigned respectfully pray

Communication

~~PETITION~~

From

of Miss Elsie F. Whelan
115 A.t. Auburn St. Cambridge

for requesting that something be done about having a Bus Stop on Brattle Square for Busses going to Belmont.

Mr. Forrest L. Gould
Clerk of Committees
Cambridge, Massachusetts

Dear Sir:

Mr. Dana reported to the Board of Trustees at their meeting that he had had a conference with the Committee on Public Service and representatives from the Cottage Farm section who were vitally interested in the problem, and that they desired the Trustees to experiment a second time on Sundays with service on Brookline and Granit Streets.

He reported also that the petitioners thought there was spare time on other lines to render this service without adding to cost. We have found that that is not a fact and that any extension of other lines would be equivalent to the operation of the line itself by adding expense.

The Trustees are not in an enviable position when people have to be deprived of facilities that they have previously enjoyed but the facts are that the Trustees have been required to adopt a policy all over the system, as is being done on Sundays by other systems in the United States, to reduce or discontinue mileage where the number of people utilizing it averages such a low figure as was the case on the Green St.-Pearl St. line. Even with the infrequent headway operated there were over three times the number of seats at the maximum load point as passengers, and the distance involved for the average user was less than 1800 feet.

The Trustees believe that by their willingness to experiment after they had discontinued the line, they had already acquiesced as far as they could and still be consistent with their responsibilities and policies in this regard over the entire system.

Very truly yours,

(Signed) Walter J. Waldron
Chairman

Statement by Edward Dana, General Manager,
Metropolitan Transit Authority, on Monday, January 28, 1952,
before the legislative committee on Metropolitan Affairs.

****

On January 7, 1952, I gave this Committee a comprehensive statement concerning the problems of the M.T.A. which demand constructive action in the public interest.

The average car rider or taxpayer naturally has little appreciation of the magnitude of the problem, nor of the difficulties involved in finding an equitable solution.

There is insistent demand for more and more service and facilities by some who do not know all the factors.

Recently there have been demands for added service on lines that now are in fact well serviced, but such fact does not in the slightest degree reduce the demand for still more.

Somebody, of course, has the duty of determining what is fair and right, and what is unreasonable and causes added deficits.

The Legislature has placed that task specifically by law upon a Board of Trustees under Section 12 of the Public Ownership Acts of 1947 and 1949.

These men, and the Management which assists them, are not working for any private interests but only for the best interest of car riders and taxpayers.

In good conscience such public servants cannot forfeit their legal responsibility and simply hand out all the service and facilities for which the riders may ask.

Statement before
Comm. on Metropolitan Affairs - #2
January 28, 1952

The figures for the week ending Friday, January 11, 1952, compare with the corresponding week during the last six years, as follows:

Week Ended	Passenger Revenue	Revenue Miles	Revenue Passengers	Revenue Passengers Per Mile
1-11-46	$745,416.64	1,047,095	8,554,080	8.17
1-10-47	818,509.93	1,101,668	8,326,666	7.56
1- 9-48	796,822.17	1,035,162	8,127,401	7.85
1-14-49	730,678.75	1,089,093	7,443,341	6.83
1-13-50	745,619.33	1,015,673	Not available	
1-12-51	860,889.51	1,004,776	6,357,976	6.33
1-11-52	796,804.63	939,994	5,838,285	6.21

The revenue passengers for this recent week are 31.7% below 1946 and the miles operated were 10.2% below 1946. In terms of revenue passengers per mile, a good method of measuring service, there were only 6.21 this year as compared with 8.17 in 1946. That means the overall service is better in 1952 than it was for the same week in 1946 and is in fact better than for any of the other years shown. These are simply, unadorned facts, and the only way any such problems can be faced.

Most of the reduction of mileage has occurred on Sundays, Holidays and evenings, and is justified by the relation between a Sunday and a weekday, as is evidenced by the following comparison:

	Tuesday Jan. 8, 1952	Sunday Jan. 6, 1952	Decrease Sunday %
Revenue Passengers	940,603	360,214	61.7
Revenue Miles	151,984	66,946	56.0
Rev. Pass. per Mile	6.19	5.38	13.1

Statement before
Comm. on Metropolitan Affairs - #3
January 28, 1952

Now let us examine financial facts.

The 1951 deficit is expected to be 5½ million dollars and we are faced now with other costs which were not experienced in 1951, as follows:

1.	On the basis of present riding losses, if sustained for the year, loss of revenue of	$1,972,500.
2.	Estimated increase in cost of living wage adjustments compared to 1951	843,600.
3.	Estimated cost of 4¢ per hour wage increase, effective January 1, 1952	596,600.
4.	Estimated increase in interest on funded debt compared to 1951, due principally to East Boston Rapid Transit Extension	383,700.
5.	Increase in principal reduction payments to Boston Metropolitan District due to financing of passenger equipment in 1951	319,000.
6.	Any added cost that may occur in prices of oil, gas, rail, and other supplies	?
7.	Any added cost of accident verdicts which have consistently increased over recent years	?
8.	Any increased cost from union agreements that expire in 1952	?

Such facts as these have forced the reduction in mileage at times when it is entirely justified.

Despite the fact that we are now operating approximately 70,000 less miles each week than one year ago, the revenue passengers per mile are fewer than a year ago.

Statement before
Comm. on Metropolitan Affairs - #4
January 28, 1952

The employees on the weekly payroll for the latest week were 7,897 as compared with 8,024 for the same week in 1951 and will be reduced further during 1952.

A far-flung transportation system operating 18,773 round trips each weekday cannot long be operated successfully on a referendum basis. To operate it in such a manner would impose additional heavy costs which are certainly inconsistent with the financial facts as they actually exist today.
