Dear Councilman/Alderman:

5-180
The Institute for Governmental Services of the University of Massachusetts is currently involved in the design, development and implementation of a state-wide in-service training program for local government which receives contributive support from the Inter-Governmental Personnel Act as administered through the U. S. Civil Service Commission and at the state level by the State Bureau of Personnel and Standardization.

As you are probably aware, little, if any, applied research/authoritative data has been compiled on the role of City Councils/Boards of Aldermen and their respective training needs. Therefore, it is the express purpose of the attached questionnaire to elicit responses from each councilman/alderman as to their individual training preferences, topical concerns and direct input. The results of the survey here involved is expected to find expression in a follow-up state-wide educational seminar to be held either in the late spring or early fall.

The interest which you express in response to the questions in this needs assessment and your continued active participation in subsequent educational programs, will be greatly appreciated.

Yours very truly,

Maurice A. Donahue
