Cambridge, Massachusetts,
Office of the City Engineer.
City Hall.

November 17, 1930.

To the
Honorable the City Council
of the City of Cambridge.

Gentlemen;-

Referring to the accompanying petition of the President and Fellows of Harvard College, dated November 5, 1930, for permission to extend the sewer, recently built by them in Divinity Avenue (from Kirkland Street northerly about six hundred thirty-five (635.0) feet), to connect with a common sewer existing in the continuation of Everett Street, said extension to be about five hundred twenty-five (525.0) feet in length.

This extension is deemed necessary by the College on account of changes in the drainage plans of several very large and important buildings now being erected by the College on Divinity Avenue. In my opinion it will be desirable to have this sewer extended to and connect with the Everett Street sewer, thus giving the Divinity Avenue sewer two (2) outlets instead of one (1).

I recommend that permission be granted upon the following conditions.

1st. The College will, at its own expense, construct the sewer (not less than eighteen inches (18") in diameter and upon grades satisfactory to the City Engineer of Cambridge) about five hundred twenty-five (525.0) feet long, and release it to the City of Cambridge.

2nd. The College will release to the City of Cambridge a sufficient right of way twenty (20.0) feet wide in which the sewer may be

maintained.

3rd., The College will first pay into the City Treasury an assessment upon the area of land benefited by the sewer of two cents ($0.02) per square foot, the same as proposed in my communication to the Honorable Board dated September 23rd, 1930, amounting in that case to two thousand nine hundred dollars ($2,900.00).

The amount of the assessment on the proposed extension is three thousand four hundred forty-eight dollars ($3,448.00), making a total assessment on the entire sewer of six thousand three hundred forty-eight dollars ($6,348.00).

Very truly,

L. M. Hastings

City Engineer.

LMH:H

Cambridge November 5, 1930. 192

To the Honorable, the City Council
of the City of Cambridge:

The undersigned respectfully pray that the President and Fellows of Harvard College be permitted to extend the sewer in Divinity Avenue, recently constructed by them in accordance with a permit granted them by an order of the Honorable City Council, dated September 30th, 1930. Said sewer will extend from the point indicated in the said order as six hundred thirty-five (635) feet from Kirkland Street northerly to and connect with the present existing sewer in a continuation of Everett Street, a distance of about five hundred twenty-five (525) feet. This extension is made necessary by a change in the drainage plans of the new large Biological Labratory and the Farlow Library. T he location of this extension is shown on the accompanying blue print Numbered 6711A.

In City Council

November 25, 1930.

ORDERED:-

On the petition of the President and Fellows of Harvard College that permission be and hereby is granted them to extend the sewer in Divinity Avenue, recently constructed under authority granted by an order of the City Council adopted September 30, 1930. Said sewer to extend from the point indicated in the aforesaid order as six hundred thirty-five (635) feet from Kirkland Street northerly to and connect with the present existing sewer in Everett Street, a distance of about five hundred twenty-five (525) feet, all as shown on plan Numbered 6711A and on file in the office of the City Engineer of Cambridge, Mass., and subject to the following conditions:-

First:- That the President and Fellows of Harvard College first pay into the City Treasury an assessment of two cents ($0.02) per square foot upon the area of land benefited by said sewer amounting in this case to Three Thousand Four Hundred Forty-Eight ($3,448.00) Dollars.

Second:- That the President and Fellows of Harvard College will, at its own expense, construct said sewer, not less than eighteen inches (18") in diameter, and upon grades satisfactory to the City Engineer of Cambridge and release to the City of Cambridge all rights and interests in said sewer when constructed so that said sewer may become an integral part of the sewer system of the City of Cambridge.

Third:- That the President and Fellows of Harvard College grant an easement, for sewerage purposes, to the City of Cambridge in a strip
