Almost the entire length of the present cement sidewalk in front of our residence at 46 Brewster St. is badly cracked and the surface has heaved up in some places and down in others - making for extremely uneven walking ~~area~~. We have lived with this condition for many years now, but I am particularly anxious to make a plea for some quick action to improve the sidewalk at this point as my 90-year old mother is now living with us. She has a hard time with the uneven spots, to say the least.

We all would be most grateful for any action you can take to get this job done as soon as possible. Thank you!
