Mr. James L. Sullivan
City Manager
City Hall
Cambridge, Massachusetts

Dear Mr. Sullivan,

As we discussed with the City Council and members of the Peabody PTA and residents of the area, I have requested and received approval for the installation of traffic control devices for Taylor Square from the State Department of Public Works under the TOPICS program. The design work has been completed and we are waiting for the State to advertise for bids. As of today, I have not received a scheduling of this project from the State.

A contract was awarded to upgrade the traffic signals at the intersection of Sherman Street and Walden Street and at the present time all the underground work has been completed and the State has informed me that they are awaiting the delivery of the aluminum mast arms and as soon as they arrive they will complete the installation.

As for the proposed traffic signal installation at the intersection of Raymond Street and Upland Road, I have requested that this project be included in the 1975/76 TOPICS requests to the State DPW and if this is approved, I will take the necessary steps to install these signals.

Very truly yours,

George Teso
Traffic Director
