

Guidelines for actualizing the 2nd Phase of the American Revolution

It will not be allowed to turn into a personality cult of a few people.

This is about the liberation and empowerment of The American People.

The slavers control the world by making the laws, by controlling the money and resources and by murdering who ever opposes them.

The slavers are the European monarchies and aristocrats, The core of which is the British-Germanic-Reptillion monarchy. the international bankers and all industrialists and all diabolical secret societies, theoreticians, scientists, subversive agents and killers hidden within all levels of society who align with them.

But you should understand that the monarchical beast is not the ultimate concern for it is merely our current representative of that force. Were it not them we'd be dealing with the same kind of force in another guise. To think if you stop them, you stop it, is a delusion. You must stop that force ETERNALLY wherever it seeps through. Just to set the record straight although I use the word to describe the creature, I recognize no such concept of "royalty" as valid but merely a theatrical contraption to perpetuate the deception of superiority-inferiority authority.

All those who say they deserve the right to be Americans must take it upon their shoulders to examine and perfect a just and solid Everlasting Constitution.

I have written a foundational plan which contains necessary preliminary information and a concept of how the organized effort to create the vision might proceed. I make no claim to say that it's perfect but it's something to begin within.

All citizens must relentlessly urge their city government officials to be centrally involved in the effort. The city government is paid for by the citizens and must assist in the national effort of coordination.

In the constitution there must be justice for all styles so long as all styles respect each others common sense rights.

I say to all those participating do not use political coercion to influence The People. Allow The People to evolve at their own pace for this is more than just writing a constitution it is an act of massive educational empowerment which will lead to the end of exclusive law makers, who can be covertly manipulated with each new election. It is an end of the use of money to destroy people's lives. It will require great effort in thought, in patience, in courage.

Now finally in short what needs to be done is 1. the nation must be defended, 2. the Everlasting Constitution Vision must be created and 3.

YOU must study and work to create a life for yourself that you Enjoy. For what good is a secure nation and what good is a great national vision if you personally are not happy.

National Officer In Charge

A nation of people the majority of which follow orders, will be destroyed, because a hatred will develop between the order givers and the subservients.

A nation whose people are capable of independent action and yet can work as a team will be strong.

A nation of people whose primary interest is pleasure, will be either enslaved or destroyed.

There should be no requirement to attend or stay at any meeting. Those who want to be there are the ones who should be there.

A nation whose people do not develop their personal creative skills will be a nation of societal conflict and a wager of war.

A nation of people that require excessive amounts of laws is the sign of an irresponsible, unintelligent people.

A nation whose people are not aligned with the fulness of the wisdom of the Source of Creation will eventually perish.

Those who destroy boredom will endure
