COMPOSTING

"At the Alcott Elementary School we have used your Green Magic Tumblers to compost 2 tons of cafeteria food and paper waste so far. The tumblers keep the waste contained, accelerate decomposition, and turn easily. They make suburban institutional composting possible!"

Jamie Bemis,
Composting Coordinator
Concord, MA

Our Green Magic Tumbler Makes Bushels of Compost Fast and Easy

Making compost in a tumbler is quicker and easier than any other method we've tried—just load the barrel and give it a spin every few days. In as little as 3-4 weeks you can have a tumbler full of finished compost and be ready to begin another batch. The problem with most compost tumblers is that they're too large and too expensive for the average gardener. But we are happy to offer one that's sized and priced just right. Now every gardener can afford to have plenty of compost all season long.

Our Green Magic Compost Tumbler comes from England, where it is widely used

by gardeners. The durable barrel is made from 50% post-consumer recycled plastic and mounted on a steel frame with an aluminum axle. The barrel has a clamp-on lid and vent holes for aeration.

The Green Magic Tumbler assembles in minutes and will last for years. The barrel holds 7 cubic feet of organic matter. The stand measures approximately 27" wide x 37" deep, overall height is approximately 41".

A 2-oz packet of BioActivator is included FREE with your tumbler.

2-257 Green Magic Tumbler \$129.95
