RICHARD C. ROSSI
Deputy City Manager

November 25, 1991

To the Honorable, the City Council:

In response to Awaiting Report #21 regarding odors from the transfer station operating at North Point by BFI, please be advised of the following:

Senior Sanitary Inspector Joseph Nicoloro inspected the BFI site on August 1, 1991, the day the complaint was received by the Inspectional Services Department. Mr. Nicoloro met with Ed Segall of BFI and found the site satisfactory. On September 17 and 18, 1991 after receipt of the Council Order, Sanitary Inspector Peter Connolly again inspected the site. At these times he also found no obnoxious odors other than that of light diesel fumes from equipment used to remove refuse. Similarly, he found the grounds within the compound and the entry-exit road to be clean, and noted no rodents.

On the MDC property, however, Inspector Connolly did note rodents as well as high piles of dirt, rotted or other wise defective boards, and rotted brush and tree trunks, all which can harbor rodents. The MDC was notified of this situation.

Cleaning of the area by the MDC is in progress. On-going visits to the areas by Inspectional Services will continue.

Very truly yours,

A handwritten signature in black ink, appearing to read "Robert W. Healy", is written over a horizontal line.

Robert W. Healy
