Dear Members of the City Council,

I am writing to let you know of my support for the passage of an ordinance which would make the research institutions in Cambridge accountable to the citizens of Cambridge. I am convinced that there is large-scale waste of money in the funding of animal experiments. At present, many experimenters do not have to prove that their work is worthwhile before getting funded. In particular, I would like to see M.I.T. forced to make their research protocols available to the public. They definitely seem to be hiding something. Thank you.

Sincerely,

Felda Feinberg
