**Petitions addressed to:  
Councillor Myers**

**Which Councillors should receive this letter?**

*They all know me!*

Dear CCLN,

Please deliver the enclosed petition to the following councillors: (check as many as you wish — we'll make the copies).

Frank Duehay

Jonathan Myers

Ken Reeves

Sheila Russell

Michael Sullivan

Tim Toomey

Bill Walsh

(note: Kathy Born and Katherine Triantafillou are already solidly opposed to Son of Z.)

**This is the letter we'll deliver on your behalf - remember to sign the bottom!**

Dear Councillor,

I urge you to maintain Cambridge's lawsuit against the Central Artery's "Son-of-Z" plan, and to instruct the City Manager to NOT SIGN to accept the mitigations.

Son of Z is a very poor deal for Cambridge. The rationale for the Central Artery is aesthetic, with more than \$11 billion to be spent to beautify just one mile in Boston's financial district. But the proposed interchange over the Charles River, Cambridge, and Charlestown is an aesthetic and environmental nightmare. Its maze of spaghetti-like twists and turns will place the Charles in a 330-foot culvert and spew out noise and pollution 24 hours a day, turning parts of Cambridge into an unhealthy battle zone, all done to speed suburban travelers' commutes.

The value of these so-called "mitigations" as currently proposed, is a mere fraction of the highway's land value itself, and woefully inadequate for city residents who will suffer from the increased traffic, noise, and pollution. It is doubtful, moreover, that the City will ever see a penny of the promised funds since the state's share of the project already exceeds \$4 billion, a sum which cannot be met without gutting the state's economy for decades. Courts have already ruled that agreements of the type about to be signed are unenforceable.

*Sept. 23, 1994*

**This is the letter we'll deliver on your behalf - remember to sign the bottom!**

Dear Councillor,

I urge you to maintain Cambridge's lawsuit against the Central Artery's "Son-of-Z" plan, and to instruct the City Manager to NOT SIGN to accept the mitigations.

Son of Z is a very poor deal for Cambridge. The rationale for the Central Artery is aesthetic, with more than \$11 billion to be spent to beautify just one mile in Boston's financial district. But the proposed interchange over the Charles River, Cambridge, and Charlestown is an aesthetic and environmental nightmare. Its maze of spaghetti-like twists and turns will place the Charles in a 330-foot culvert and spew out noise and pollution 24 hours a day, turning parts of Cambridge into an unhealthy battle zone, all done to speed suburban travelers' commutes.

The value of these so-called "mitigations" as currently proposed, is a mere fraction of the highway's land value itself, and woefully inadequate for city residents who will suffer from the increased traffic, noise, and pollution. It is doubtful, moreover, that the City will ever see a penny of the promised funds since the state's share of the project already exceeds \$4 billion, a sum which cannot be met without gutting the state's economy for decades. Courts have already ruled that agreements of the type about to be signed are unenforceable.

**This is the letter we'll deliver on your behalf - remember to sign the bottom!**

Dear Councillor,

I urge you to maintain Cambridge's lawsuit against the Central Artery's "Son-of-Z" plan, and to instruct the City Manager to NOT SIGN to accept the mitigations.

Son of Z is a very poor deal for Cambridge. The rationale for the Central Artery is aesthetic, with more than \$11 billion to be spent to beautify just one mile in Boston's financial district. But the proposed interchange over the Charles River, Cambridge, and Charlestown is an aesthetic and environmental nightmare. Its maze of spaghetti-like twists and turns will place the Charles in a 330-foot culvert and spew out noise and pollution 24 hours a day, turning parts of Cambridge into an unhealthy battle zone, all done to speed suburban travelers' commutes.

The value of these so-called "mitigations" as currently proposed, is a mere fraction of the highway's land value itself, and woefully inadequate for city residents who will suffer from the increased traffic, noise, and pollution. It is doubtful, moreover, that the City will ever see a penny of the promised funds since the state's share of the project already exceeds \$4 billion, a sum which cannot be met without gutting the state's economy for decades. Courts have already ruled that agreements of the type about to be signed are unenforceable.

Signed  Print name D.S. ZAGOROFF

I urge you to maintain Cambridge's lawsuit against the Central Artery's "Son-of-Z" plan, and to instruct the City Manager to NOT SIGN to accept the mitigations.

Son of Z is a very poor deal for Cambridge. The rationale for the Central Artery is aesthetic, with more than \$11 billion to be spent to beautify just one mile in Boston's financial district. But the proposed interchange over the Charles River, Cambridge, and Charlestown is an aesthetic and environmental nightmare. Its maze of spaghetti-like twists and turns will place the Charles in a 330-foot culvert and spew out noise and pollution 24 hours a day, turning parts of Cambridge into an unhealthy battle zone, all done to speed suburban travelers' commutes.

The value of these so-called "mitigations" as currently proposed, is a mere fraction of the highway's land value itself, and woefully inadequate for city residents who will suffer from the increased traffic, noise, and pollution. It is doubtful, moreover, that the City will ever see a penny of the promised funds since the state's share of the project already exceeds \$4 billion, a sum which cannot be met without gutting the state's economy for decades. Courts have already ruled that agreements of the type about to be signed are unenforceable.

Dear Councillor,

Please maintain the lawsuit by Cambridge against the Son-of-Z plan for the Central Artery.

Please instruct the City Manager to not sign to accept the mitigations.

The proposed interchange over the Charles River in Cambridge and in Charlestown is a very ugly solution to the problem and is not friendly the environment. It would ruin Cambridge as a city for people.

Most sincerely,

Lucy Tittmann

Mr. Jonathan S. Myers  
Cambridge City Council  
Cambridge City Hall  
795 Massachusetts Avenue  
Cambridge, MA 02139

Re: Central Artery Lawsuit

Dear Jonathan:

I am writing you as a home owner and as the founder of a business that employs sixteen people, more than half of whom are Cambridge residents. I am writing to urge you to maintain the Central Artery's "Son-of-Z" lawsuit. To those of us who admired from afar Cambridge's successful fight to halt the innerbelt, the prospect of accepting the nominal mitigations for the Central Artery Project is simply unbelievable. That the mitigations include what amounts to an innerbelt through the eastern part of Cambridge is astonishing. In my view your response to these impending disasters should be "they shall not pass!"

Therefore I urge you to maintain Cambridge's lawsuit against the Central Artery's "Son-of-Z" plan. I also urge you to instruct the City Manager not to accept the state's mitigation plan.

To say the most for it, Son-of-Z -- however it is presented -- is a bad deal for Cambridge. The original rationale for the Central Artery was aesthetic: \$11 billion was to be spent to beautify just one mile in Boston's Financial District. However, the proposed interchange over the Charles River connecting Cambridge and Charlestown can only be described as an uglification project.

And, that is to say nothing of the environmental impacts. There is every reason to believe that the artery both in its construction phase and in its operation cannot possibly meet clean air standards.

But leave aside the concerns that affect all of eastern Massachusetts. Just consider the interest of your constituents, the people who elected you. Do we deserve to have the noise, pollution, and desolation that will accompany the artery

Mr. Myers

September 27, 1994

and its "mitigations"? Hardly!

As city councilors confronting the real prospect of hitting the Proposition 2 1/2 ceiling, you must be concerned about projects that will erode the tax base in both the residential and commercial sectors. If ever a vote by city council to protect the interest of their narrow constituency would benefit an entire region, your vote against the artery and the "mitigations" will make that difference.

Sincerely,

Peter D. Kinder  
President

November 9, 1994

To the Honorable City Council  
City of Cambridge  
Cambridge, Massachusetts

Dear Councillors,

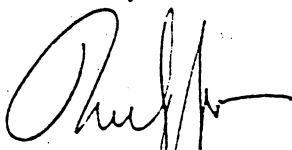

Enclosed are 380 petitions from Cambridge residents. These individuals have written to you requesting that you to maintain Cambridge's lawsuit against the Central Artery's "Son-of-Z" plan, and to instruct the City Manager to NOT SIGN to accept mitigations.

The proposed Charles River Crossing (Son of Z) is a very poor deal for Cambridge. The rationale for the Central Artery is aesthetic, with more than \$11 billion to be spent to beautify just one mile in Boston's financial district. But the proposed interchange over the Charles River, Cambridge, and Charlestown is an aesthetic and environmental nightmare. Its maze of spaghetti-like twists and turns will place the Charles in a 330-foot culvert and spew out noise and pollution 24 hours a day, turning parts of Cambridge into an unhealthy battle zone. all done to speed suburban travelers' commutes.

The value of these so-called "mitigations" as currently proposed, is a mere fraction of the highway's land value itself, and woefully inadequate for city residents who will suffer from the increased traffic, noise, and pollution. It is doubtful: moreover, that the City will ever see a penny of the promised funds since the state's share of the project already exceeds \$4 billion, a sum which cannot be met without gutting the state's economy for decades. Courts have already ruled that agreements of the type about to be signed are unenforceable.

We urge you to instruct the City Manager to forego negotiating for mitigations. We instead ask that the City of Cambridge pursues a Charles River Crossing plan which lessens the impact of the Artery and one that more closely meets the needs of Cambridge.

Sincerely,

Phillip Sego

But the proposed interchange over the Charles River, Cambridge, and Charlestown is an aesthetic and environmental nightmare. Its maze of spaghetti-like twists and turns will place the Charles in a 330-foot culvert and spew out noise and pollution 24 hours a day, turning parts of Cambridge into an unhealthy battle zone, all done to speed suburban travelers' commutes.

The value of these so-called "mitigations" as currently proposed, is a mere fraction of the highway's land value itself, and woefully inadequate for city residents who will suffer from the increased traffic, noise, and pollution. It is doubtful, moreover, that the City will ever see a penny of the promised funds since the state's share of the project already exceeds \$4 billion, a sum which cannot be met without gutting the state's economy for decades. Courts have already ruled that agreements of the type about to be signed are unenforceable.

**This is the letter we'll deliver on your behalf - remember to sign the bottom!**

Dear Councillor,

I urge you to maintain Cambridge's lawsuit against the Central Artery's "Son-of-Z" plan, and to instruct the City Manager to NOT SIGN to accept the mitigations.

Son of Z is a very poor deal for Cambridge. The rationale for the Central Artery is aesthetic, with more than \$11 billion to be spent to beautify just one mile in Boston's financial district. But the proposed interchange over the Charles River, Cambridge, and Charlestown is an aesthetic and environmental nightmare. Its maze of spaghetti-like twists and turns will place the Charles in a 330-foot culvert and spew out noise and pollution 24 hours a day, turning parts of Cambridge into an unhealthy battle zone, all done to speed suburban travelers' commutes.

The value of these so-called "mitigations" as currently proposed, is a mere fraction of the highway's land value itself, and woefully inadequate for city residents who will suffer from the increased traffic, noise, and pollution. It is doubtful, moreover, that the City will ever see a penny of the promised funds since the state's share of the project already exceeds \$4 billion, a sum which cannot be met without gutting the state's economy for decades. Courts have already ruled that agreements of the type about to be signed are unenforceable.
