

Communications 4/21/97 National Officer In Charge Peter EXC Valentine
37 Brookline St. US Military and National and Planetary Security Center

Dear Council,

Whereas William Clinton has leased land in Long Island, San Diego, CA to the Chinese Communists, the direct enemies of Freedom, the Higher Aspects of Democracy and Human Rights, to establish a Military Base there, and

Whereas he has allowed this same enemy to establish two naval bases one on each side of Panama and

Whereas he has allowed this same enemy to build and operate ammunition factories in Alabama and California. All of the above news having been either in the regular news media or on the Internet.

Further you should understand in Mississippi there have been stored 700 Russian military trucks under the lie that they are there to be painted. They haven't been painted in three years. And we all know Russia can paint its own trucks. It has also been reported that Russian tank battalions have been seen traveling through Florida. My point is the federal gov't has allowed foreign military equipment and personnel upon our soil and near our people of nations who are quite capable of using trojan horse tactics of peace. Consider that the Chinese Communists and the Russian Communists may be in contact with Castro.

Monday night at council meeting I will charge him with Direct Treason and

Whereas the Congress has not charged him with treason, its Silent Consent, in concerned for the Absolute Security of The Nation, cannot be waived on with wondering considerations and therefore it must be considered that The Congress to some degree, which must be investigated, is engaging in Treason as well, therefore

I intend to charge Congress with Treason as well.

These two facts being the case and the States not activating charges of Treason. there at this moment exists No Presidency and No Congress and No federal Government and also there exists no union of states with the spine to act, therefore according to Constitutional Amentment 10 since no other power but The People exists and in accordance with my inalieble rights to Life and Liberty I will reaffirm my authority as National Officer In Charge.

I will formally Announce the Activation of the Second Phase of the American Revolution

I will declare an Enlightened State of martial law. This will mean that out basic freedoms will stay in tact except where it is clear to everyone that the enemy is defiling a basic freedom to attack us such as controlling news which is vitally important to out survival.

My first Martial Law will be that when I speak in the Public Sector comment, if I should need to go a few minutes over time that it will be

law that I will be allowed to do so. I assure you I will do everything I can to stay within the ten minutes, but understand that these moments and events are critical in terms of removing the enemies that have so long oppressed and tormented us.

I convey all because I will ask you, if you disagree with my authority to state why you disagree. You should understand that I speak for the interests of The People and to the contrary we cannot know for sure who in the federal government speaks for what.
