

To Whom it May Concern at the Cambridge City Council,

A once gorgeous city park in Cambridge has been taken away from all of us. And I am told that you all at the City Council know about this.

I am writing this letter to let you all know that many area residents are extremely angry with the fact that the destruction was allowed and is now being justified by those elected to represent us. What we want is for Cambridge to be beautiful for our children, to have areas of natural beauty protected, for our representatives to support family values, and to help provide a conscientious environment for our children. The destruction of the Geese meadow represents the opposite of all of these important qualities and is destructive to the future of our community. It puts the cohesiveness and happiness of our community secondary to the interests of developers and corporations. This is not acceptable.

Please hear us and know that the community is watching.

Michael T. Sullivan and family
144 Pemberton St.
Cambridge

Consent Communication #4

1775

A communication was received from
Michael T. Sullivan and family, relative
to protection of the white geese meadow
along the Charles River.

In City Council June 12, 2000
