

109 Irving St., Cambridge

May 20, 1929

To the Honorable,

The City Council of the City of Cambridge,
City Hall, Cambridge, Mass.

Gentlemen:

Since I mailed the petition of E. L. Mark et al. relative to the extension of the Francis Avenue sewer to the Kirkland^{St.} sewer, Mr. C. F. Whiting, who signed the petition, has telephoned me that when he signed he was under the impression that he would share with others living in Francis Avenue in the costs. Since it now appears that he (not being an abutter on the proposed sewer) would not be assessed, and since he does not wish to impose burdens on his neighbors without sharing in the costs, he asks me to have his name removed from the petition.

I am writing at once to inform you of his desire.

Sincerely yours,

E. L. Mark

To the Honorable, the City Council
of the City of Cambridge:

The undersigned respectfully pray

Communication

PETITION

of from Edward L. Mark
109 Irving St.

for stating that Mr. C. F. Whiting
desires to have his name removed
from petition for extension of Francis
sewer to Kirkland St. sewer

May 21st 1929.

In City Council, ^{MAY 21 1929} 192

Referred to Committee on

City Eng.

Attest:

Fredrick H. Burke

City Clerk.

109 IRVING ST.
CAMBRIDGE, MASS.

To the Honorable, the City Council
of the City of Cambridge:

The undersigned respectfully pray

that the Francis Avenue sewer (which now discharges into the large Kirkland street sewer by the roundabout way of the Bryant St. and Irving St. sewers) be extended to the Kirkland St. sewer through the part of Francis Avenue now without a ^{public} sewer, so as to discharge into the Kirkland St. sewer directly.

The purpose of the suggested change is to relieve the Irving St. sewer of part of the surface water which now congests that sewer at the corner of Irving and Bryant streets after heavy rains so that the water rises into the street gutters and at times even covers the roadbed. One of the results of this congestion is to force the sewage back from the street into adjacent cellars, through set washtubs and water-closet fixtures, resulting in very unsanitary conditions.
