Dear Selectmen:

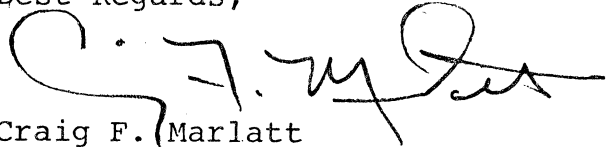

It is a pleasure to announce the expansion of our bridge line into the State of Massachusetts. Currently, we have established territory in eleven northeastern states. Eco Bridge specializes in low cost bridges and culverts.

Eco Bridge offers complete project development including on-site inspections, efficient problem solving alternatives, design and engineering parameters, realistic budget estimates and specifications complete with plans that will enable you to have a first class project. Also, we will establish a maintenance program that will increase the life expectancy of your structures and in the long run, save you money. Innovative financing is also available.

The majority of our work load is received from communities such as yours. Eco Bridge goes the extra step. Without your support, we never would have made it this far.

Call us today and we will send a representative to discuss your project at no cost or obligation to you. Thanks for your interest in our bridge line.

Best Regards,

Craig F. Marlatt
Marketing Manager
