April 7, 1980

Dear Gentlemen,

On April 22, 1980 at 7:30 pm at the John F. Kennedy School of Government, the Environmental Action Committee of the Philips Brooks House, the Student Advisory Committee of the Institute of Politics and the Environmental Law Society will sponsor a panel discussion entitled: "Community Energy Planning: Politics and the Plan."

Each of five participants, chosen for their recent involvement in the area of energy planning at the community level, will present a short written statement outlining the problems and objectives of the issue as they see it. A moderator will present questions which the participants will have considered in advance. Following this, the floor will be opened to questions from the audience.

The panelists include:

Angus Duncan, Director for Energy Planning, U.S. Dept. of Transportation
Henry Lee, Executive Director, Energy & Environmental Policy Center
John Altschuler, Private Consultant
Garry DeLosse, Deputy Director of Mass. Energy Office
Edward Brown, President of New England Power Company

A short reception will follow at which we hope you will have the opportunity to meet the panelists.

Please join us.

Thank you.

Sincerely,

David Adamson
