TO: Robert W. Healy, City Manager
FROM: John J. Cusack, Jr., Superintendent
DATE: October 21, 1983

SUBJECT: Council Order No. 5 - (10-3-83) - Hurley Street

In response to your request for information pertaining to water & sewer lines in the 336 thru 370 block of Hurley Street, please be advised that the Water Department has researched the utility records in this area and is reporting as follows:

WATER MAIN: The existing water line in Hurley Street (between 4th and 6th Streets) is a 6-inch cast iron main, installed in 1934.

WATER SERVICES: The existing water service connections in the 336-370 block have been installed or replaced by individual property owners on an as needed basis. Dates of installation range from 1934 to 1983.

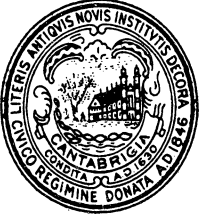

STORM DRAIN/
SANITARY SEWER: The existing storm drain and sanitary sewer systems were installed in 1935 as part of a combined sewer separation program. The sanitary sewer is 8-inch, and the storm drain ranges in size from 10-inch to 15-inch diameter.

OTHER WORK: The City recently completed a combined sewer separation program on other portions of Hurley Street, under a State and Federal water pollution control construction grant. Since the storm drain/sanitary sewer system in the 336 thru 370 block was already separated, no additional work was necessary.
